1. The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that proper record-keeping is essential for the integrity of the financial system and for the ability to detect and prevent fraud. The text outlines the various methods used to collect and analyze data, including the use of statistical models and computerized databases. It also mentions the role of the audit committee in overseeing the process and ensuring that all procedures are followed correctly.

2. The second part of the document focuses on the specific steps involved in the audit process. It begins with the selection of the audit team, which is typically composed of members from different departments to ensure a comprehensive review. The next step is the planning phase, where the scope of the audit is defined and the resources are allocated. This is followed by the execution of the audit, which involves the collection of evidence and the application of professional judgment. Finally, the results are reported to the management and the audit committee, and any necessary corrective actions are implemented.

3. The third part of the document discusses the challenges faced by auditors in the current business environment. It highlights the increasing complexity of transactions and the need for auditors to stay up-to-date with the latest accounting standards and regulations. It also mentions the importance of maintaining a high level of independence and objectivity, as well as the need for continuous professional development. The text concludes by emphasizing the role of the audit committee in ensuring that the audit process is effective and that the financial statements are reliable.

4. The fourth part of the document provides a detailed overview of the audit process, from the initial planning to the final reporting. It describes the various steps involved in the audit, including the selection of the audit team, the planning phase, the execution of the audit, and the reporting of the results. It also discusses the importance of maintaining accurate records and the role of the audit committee in overseeing the process. The text emphasizes the need for auditors to maintain a high level of independence and objectivity, and the importance of continuous professional development.

5. The fifth part of the document discusses the challenges faced by auditors in the current business environment. It highlights the increasing complexity of transactions and the need for auditors to stay up-to-date with the latest accounting standards and regulations. It also mentions the importance of maintaining a high level of independence and objectivity, as well as the need for continuous professional development. The text concludes by emphasizing the role of the audit committee in ensuring that the audit process is effective and that the financial statements are reliable.

6. The sixth part of the document provides a detailed overview of the audit process, from the initial planning to the final reporting. It describes the various steps involved in the audit, including the selection of the audit team, the planning phase, the execution of the audit, and the reporting of the results. It also discusses the importance of maintaining accurate records and the role of the audit committee in overseeing the process. The text emphasizes the need for auditors to maintain a high level of independence and objectivity, and the importance of continuous professional development.

The use of l', n' and t' in Russian and Bulgarian (where they are not transliterations of a single letter, but merely l, n or t followed by the soft sign) is included to emphasise the fact that they are used for single letters only in Serbian.

'Shch' and 'sht' invariably represent the letter III, in Russian and Bulgarian, respectively, since the pairs of letters (IIIh in Russian and IIIT in Bulgarian) seem never to occur consecutively in the respective languages.

The above table is reproduced, by permission, from the pamphlet 'The transliteration of Russian, Serbian and Bulgarian for bibliographical purposes' published by the Royal Society, Burlington House, London W1 (February 1953, price 5p.). It represents the system at present in use in Science Abstracts for the transliteration of the names of journals and the names of authors of articles abstracted.

The letters "a" and "b" in Russian and Bulgarian alphabets are not combinations of a single letter but rather 1, 2 or 3 letters which are regarded as independent letters that they are used for writing words in letters.

They may be considered to represent the same thing as the letters "a" and "b" in the Russian and Bulgarian alphabets. (It should be noted that the Russian letter "a" is not a combination of letters in the Russian alphabet.)

This document is prepared by personnel of the National Security Council, Office of Russian, Serbian and Bulgarian Affairs, and is not to be distributed outside the Department of Defense. (This document is not to be distributed outside the Department of Defense.)

CUMULATIVE INDEXES

Cumulative indexes are available for *Physics Abstracts*, *Electrical & Electronics Abstracts* and *Computer & Control Abstracts*, for both authors and subjects. These cumulations generally cover a period of four years, with the exception of *Computer & Control Abstracts* where the initial volume covered the period 1966-68. The table below shows the prices and periods for the two types of cumulative index.

OTHER INSPEC SERVICES

SDI

(Selective Dissemination of Information.) This is a service individually tailored to the requirements and interests of the engineer or research worker. Details of information relevant to the interest profile of the individual subscriber are selected from the data being processed for the INSPEC database. Information is dispatched weekly on 150 mm x 100 mm (6" x 4") cards.

TOPICS

This is an SDI service based on standard profiles. There are over 70 subjects covering high-activity areas of research and development. This is an inexpensive card service designed to alert engineers and researchers to the availability of literature within their subject area.

MAGNETIC TAPES

Tapes containing all the information included in the INSPEC publications are issued twice monthly. They enable the larger research and development organisations to produce their own internal information and current-awareness services.
